

## **2014 CAMRT Annual General Conference**

### **Suggested topics**

We welcome submissions on the most current and topical issues including but not limited to the suggested topics listed below. The conference committee may also issue invitations to selected experts to ensure we offer a well rounded program that meets the needs of all disciplines.

The following list represents suggested topics that can be used as a reference.

- Cardiac sciences
- Colon imaging
- Emergency medicine / Trauma imaging
- Sports injuries
- Managing the pediatric patient
- Dose reduction in pediatric imaging
- Alternate MRT workplaces – forensics
- Ocular brachytherapy
- “Screening for distress” in oncology patients
- Nutrition in oncology patients (especially H & N)
- MR Sim
- MR Linac
- Breast health and imaging
- Intraoperative utilization of MR
- PET / MR
- MR Abdominal imaging
- Chest imaging
- Preceptorship / Mentorship – the technologist’s perspective
- Isotope supply (Ge / Ga generator / cyclotron Tc)
- Radioisotope therapy
- Molecular imaging (PET) – research
- Medical errors
- Patient advocacy
- Holistic approaches
- CR / DR – a review
- Effective short-term communication with patients
- Project management
- Asset management
- Managing the problem employee
- Succession planning
- Use of technology in the MRT classroom
- Blended learning models
- Effective use of simulation – soft skills for the MRT
- Clinical evaluation in a rapidly changing technological profession
